FUTURE PATHWAYS

How To Read The Map

The Four Quadrants

UPPER RIGHT = Fossil Fuel Growth: hydrocarbon energy is used to grow civilisation and increase questionable growth metrics such as GDP.

UPPER LEFT = Clean Growth: renewable/replaceable energy is used to grow civilisation and, yes, increase GDP.

BOTTOM LEFT = Biophysical Growth: civilisation reverses, nature heals and Earth recovers.

BOTTOM RIGHT = Collapse: civilisation fails completely, collapses and all hell breaks loose - don't go here!

The Axes

X-axis = CO2e emissions (not levels), high emissions on the right, zero emissions at origin, negative emissions on the left.

Y-axis = GDP/Civilisation/Energy use growth, all zero at origin. High +ve growth at the top, high -ve growth at the bottom.

Z-axis = Material use, not shown.

Key

DG = Degrowth * GG = Green Growth * MM = Mad Max
EM = Eco Modernist * GS = The Great Simplification?
ST = Star Trek * SP = Solarpunk * CP = Cyberpunk * EX = Extinction
